**II. BACKGROUND**

The Palau Public Utilities Corporation (PPUC) provides power, water and sewerage services to Koror and other areas in the Republic of Palau.

PPUC intends to replace a number of submersible sewage pumps, from various manufacturers, to upgrade the Koror Sewage Pumping System. PPUC operates 48 sewage pumping stations (SPS) in Koror. Of these, 38 SPS use submersible sewage pumps, and three SPS use suction lift pumps. Pumps are required to be replaced in 15 of the Submersible Sewerage pump stations and in two of the suction lift pump stations. There is no conformity in the system and pumps from a number of manufacturers have been installed. The RFP also requests supply of additional pumps to be held as back-up pumps in the event of future failures in the system.
